

Magic™ Mouse Anti-Rabies Virus Monoclonal antibody, clone 1281 (DMAB-CS23082)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Specificity	RABV
Target	Rabies Virus
Isotype	IgG
Source/Host	Mouse
Species Reactivity	RABV
Clone	1281
Purification	Ascites were purified by the methods of octanoic acid-ammonium sulfate precipitation
Conjugate	unconjugated
Applications	ELISA (Cap)
Format	Liquid
Size	1 mg
Buffer	PBS, pH7.4
Preservative	None
Storage	Short Term: 2-8°C. Long Term: -20°C. Avoid repeated freezing and thawing.

BACKGROUND

Introduction

Rabies virus, scientific name Rabies lyssavirus, is a neurotropic virus that causes rabies in animals, including humans. Rabies transmission can occur through the saliva of animals and less commonly through contact with human saliva. Rabies lyssavirus, like many rhabdoviruses, has an extremely wide host range. In the wild it has been found infecting many mammalian species, while in the laboratory it has been found that birds can be infected, as well as cell cultures from mammals, birds, reptiles and insects.
