

Mouse Anti-EBV EA Monoclonal antibody, clone 2219 (DMAB-CS24269)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Specificity	Recognizes a 55-50 kDa polypeptide associated with the early antigen of Epstein-Barr virus (EBV).
Target	EBV EA
Immunogen	Immunized with immunoprecipitated EBV early antigens
Isotype	IgG1
Source/Host	Mouse
Species Reactivity	EBV
Clone	2219
Purification	Affinity purified
Conjugate	unconjugated
Applications	FC, IHC, IF, IP
Format	Liquid
Size	100 µg, 500 µg, 1 mg
Buffer	PBS
Preservative	0.02% sodium azide
Storage	Stored at 4°C-8°C.

BACKGROUND

Introduction	The Epstein-Barr Virus, also called Human Herpesvirus 4 (HHV-4), is one of eight known human herpesvirus types and is one of the most common viruses in humans. Antibodies to several antigen complexes may be measured for detection of Epstein-Bar virus. These antigens are the viral capsid antigen (VCA), the early antigen (EA) and the EBV nuclear antigen (EBNA).
Keywords	Epstain-Barr Virus; EBV; Epstain-Barr Virus EA; EBV EA; EBV Early Antigen
