

Magic™ Mouse Anti-RHDV Monoclonal antibody, clone MP017B (DMAB-CS24322)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Specificity	RHDV
Target	RHDV
Isotype	IgG2a
Source/Host	Mouse
Species Reactivity	RHDV
Clone	MP017B
Conjugate	unconjugated
Applications	ELISA (Det)
Format	Liquid
Size	1 mg
Buffer	0.01M PBS PH7.4
Preservative	None
Storage	Store at -20°C.

BACKGROUND

Introduction	Rabbit hemorrhagic disease virus (RHDV) which causes a highly contagious disease of wild and domestic rabbits belongs to the family Caliciviridae. It is a small, positive single-stranded
--------------	--

RNA virus with a genome of 7.5 kb and has a diameter of approximately 40 nm. In negatively stained electron micrographs the virus shows typical calicivirus morphology with regularly arranged cup-shaped structures on the surface. It is a major pathogen of rabbits in many countries.

Keywords	Rabbit hemorrhagic disease virus; RHDV
