

Mouse Anti-Rat CD86 monoclonal antibody, clone 24F [FITC] (DMAB-S270F)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Specificity	The 24F antibody reacts with CD86 (B7-2), a member of the Ig superfamily of transmembrane proteins.
Immunogen	HTLV-1 transformed Lewis-S1 cells.
Isotype	IgG
Source/Host	Mouse
Species Reactivity	Rat
Clone	24F
Purification	Affinity purified
Conjugate	FITC
Applications	FC
Format	Liquid
Concentration	Lot specific
Size	500 µg
Buffer	Aqueous buffered solution
Preservative	0.09% Sodium Azide
Storage	Store at 2-8°C, do not freeze

Ship

Wet ice

BACKGROUND

Introduction	CD86, otherwise known as B7-2, a type I transmembrane protein and member of the Ig superfamily, which acts as a ligand for both CD28 and CD152 (CTLA-4), and is primarily expressed on antigen presenting cells (APCs) including dendritic cells, and also on germinal centre B cells and macrophages.
