

Anti-His tag antibody [Biotin] (DMAB27995)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Product Overview	Mouse Anti-6xHis tag Monoclonal Antibody
Specificity	Reacts with 6xHis tag in tagged proteins
Target	6xHis tag
Immunogen	Recombinant protein containing 6x His tag
Isotype	IgG1
Source/Host	Mouse
Species Reactivity	N/A
Clone	JU-000
Conjugate	Biotin
Applications	ELISA, IP, IF
Epitope	Linear Epitope
Size	50 µg
Preservative	None
Storage	-20°C. Avoid freeze/thaw

BACKGROUND

Introduction A polyhistidine-tag is an amino acid motif in proteins that consists of at least five histidine (His) residues, often at the N- or C-terminus of the protein. It is also known as hexa histidine-tag,

6xHis-tag, and by the trademarked name His-tag (registered by EMD Biosciences). The tag was invented by Roche, although the use of histidines and its vectors are distributed by Qiagen. Various purification kits for histidine-tagged proteins are available from Qiagen, Sigma, Thermo Scientific, GE Healthcare, Macherey-Nagel, Clontech, Bio-Rad, and others.
