

Anti-CROCC polyclonal antibody (DPAB-DC1044)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Antigen Description	CROCC (ciliary rootlet coiled-coil, rootletin) is a protein-coding gene. Diseases associated with CROCC include large cell medulloblastoma, and childhood medulloblastoma. GO annotations related to this gene include structural molecule activity and kinesin binding. An important paralog of this gene is LOC728763.
Specificity	Specific to recombinant protein GX0325. This antibody detects mCROCC protein.
Immunogen	Recombinant GST fusion protein corresponding to 166 amino acids of mouse Crocc.
Isotype	IgG
Source/Host	Rabbit
Species Reactivity	Mouse
Conjugate	Unconjugated
Applications	WB,
Format	Liquid
Size	50 µg
Buffer	In PBS (50% glycerol, 0.02% sodium azide)
Preservative	0.02% Sodium Azide
Storage	Store at -20°C. Aliquot to avoid repeated freezing and thawing.

GENE INFORMATION

Gene Name	Crocc ciliary rootlet coiled-coil, rootletin [Mus musculus (house mouse)]
Official Symbol	CROCC
Synonyms	CROCC; ciliary rootlet coiled-coil, rootletin; rootletin; ciliary rootlet coiled-coil protein;
Entrez Gene ID	230872
Protein Refseq	NP_001139430
UniProt ID	Q8CJ40
Chromosome Location	4 D3; 4
Function	kinesin binding; structural molecule activity;
