PRODUCT INFORMATION

Antigen Description	TAF6 (TAF6 RNA polymerase II, TATA box binding protein (TBP)-associated factor, 80kDa) is a protein-coding gene, and is affiliated with the lncRNA class. Diseases associated with TAF6 include bare lymphocyte syndrome, and progeria, and among its related super-pathways are RNA Polymerase II Pre-transcription Events and Assembly of RNA Polymerase-II Initiation Complex. GO annotations related to this gene include protein heterodimerization activity and sequence-specific DNA binding transcription factor activity. An important paralog of this gene is TAF6L.
