

Anti-H. influenzae type B Polyclonal antibody (DPAB-DC4302)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Specificity	Reacts primarily with <i>Haemophilus influenzae</i> with some reactivity towards <i>Haemophilus parainfluenzae</i> .
Target	<i>H. influenzae</i> type B
Immunogen	Native <i>Haemophilus influenzae</i> type B.
Isotype	IgG
Source/Host	Rabbit
Species Reactivity	<i>H. influenzae</i>
Conjugate	Unconjugated
Applications	sELISA, Capture Antibody, Agg, Detection Antibody,
Format	Liquid
Size	100 µl
Buffer	In buffer containing 0.1% proclin 300
Preservative	None
Storage	Store at 4°C. For long term storage store at -20°C. Aliquot to avoid repeated freezing and thawing.

BACKGROUND

Introduction *Haemophilus influenzae* (formerly called Pfeiffer's bacillus or *Bacillus influenzae*) is a Gram-negative, coccobacillary, facultatively anaerobic bacterium belonging to the Pasteurellaceae family. *H. influenzae* was first described in 1892 by Richard Pfeiffer.

Keywords Hib; *Haemophilus influenzae* Type B
