

Anti-HEV Polyclonal antibody (DPAB-DC4341)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Target	HEV
Immunogen	A synthetic peptide corresponding to amino acids 627-637 of HEV capsid protein. The sequence is CPECRTLGLQG
Isotype	IgG
Source/Host	Rabbit
Species Reactivity	HEV
Conjugate	Unconjugated
Applications	WB,
Format	Liquid
Size	100 µg
Buffer	In PBS (0.02% sodium azide)
Preservative	0.02% Sodium Azide
Storage	Store at 4°C. For long term storage store at -20°C. Aliquot to avoid repeated freezing and thawing.

BACKGROUND

Introduction	Hepatitis E virus is the causative agent of Hepatitis E. The viral particles are 27 to 34 nanometers in diameter, are non-enveloped and contain a single-strand of positive-sense RNA that is approximately 7300 bases in length. The virus particle was first
