

Anti-*S. cerevisiae* Monopolin Polyclonal antibody (DPAB-DC4545)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Target	<i>S. cerevisiae</i> Monopolin
Immunogen	A synthetic peptide corresponding to <i>Saccharomyces cerevisiae</i> Monopolin.
Isotype	IgG
Source/Host	Rabbit
Species Reactivity	<i>S. cerevisiae</i>
Conjugate	Unconjugated
Applications	WB,
Format	Liquid
Size	100 µg
Buffer	In PBS (0.02% sodium azide)
Preservative	0.02% Sodium Azide
Storage	Store at 4°C. For long term storage store at -20°C. Aliquot to avoid repeated freezing and thawing.

BACKGROUND

Introduction	Monopolin is a protein complex that in yeast is composed of the four proteins CSM1, HRR25, LRS4, and MAM1. Monopolin is required for the segregation of homologous centromeres to opposite poles of a dividing cell during anaphase I of meiosis.
