

Anti-Tetrodotoxin polyclonal antibody (DPAB-DC4815)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Immunogen	Tetrodotoxin conjugated with carrier proteins.
Isotype	IgG
Source/Host	Rabbit
Species Reactivity	N/A
Purification	Protein A purified
Conjugate	Unconjugated
Applications	ELISA
Format	Liquid
Size	100 µl
Buffer	0.01M TBS (pH7.4) with 1% BSA, 0.02% Proclin300 and 50% Glycerol
Preservative	None
Storage	Shipped at 4°C. Store at -20°C for one year. Avoid repeated freeze/thaw cycles.

BACKGROUND

Introduction	Tetrodotoxin, frequently abbreviated as TTX, is a potent neurotoxin. Its name derives from Tetraodontiformes, an order that includes pufferfish, porcupinefish, ocean sunfish or mola, and triggerfish, several species that carry the toxin. Although tetrodotoxin is found in these fish, it is not produced by the fish themselves, but rather is taken up from their diet of small organisms.
