

Magic™ Goat anti-Human cardiac troponin I (cTnI) Polyclonal antibody (DPAB-L21512)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Antigen Description	Troponin I (TnI), along with troponin T (TnT) and troponin C (TnC), is one of 3 subunits that form the troponin complex of the thin filaments of striated muscle. TnI is the inhibitory subunit; blocking actin-myosin interactions and thereby mediating striated muscle relaxation. The TnI subfamily contains three genes: TnI-skeletal-fast-twitch, TnI-skeletal-slow-twitch, and TnI-cardiac. This gene encodes the TnI-cardiac protein and is exclusively expressed in cardiac muscle tissues. Mutations in this gene cause familial hypertrophic cardiomyopathy type 7 (CMH7) and familial restrictive cardiomyopathy (RCM). [provided by RefSeq, Jul 2008]
----------------------------	--

Specificity	Human cardiac troponin I
Immunogen	Human cardiac troponin I, purity more than 98%
Source/Host	Goat
Species Reactivity	Human
Purification	Immunoaffinity method utilizing cTnI-agarose as an affinity matrix.
Conjugate	Unconjugated
Applications	Human cardiac troponin I immunoassay
Buffer	PBS, pH 7.4, 0.1 % sodium azide (NaN ₃)
Preservative	0.1% Sodium Azide
Storage	4°C

GENE INFORMATION

Gene Name	TNNI3 troponin I type 3(cardiac) [Homo sapiens]
Official Symbol	TNNI3
Synonyms	TNNI3; troponin I type 3 (cardiac); CMH7; RCM1; cTnI; CMD2A; TNNC1; MGC116817; troponin I, cardiac; Troponin I, cardiac muscle; Cardiac troponin I; familial hypertrophic cardiomyopathy 7
Entrez Gene ID	7137
Protein Refseq	NP_000354
UniProt ID	P19429
Chromosome Location	19q13.4
Pathway	Hypertrophic cardiomyopathy (HCM); Muscle contraction; Cardiac muscle contraction
Function	actin binding; calcium-dependent protein binding; protein domain specific binding; protein kinase binding; troponin C binding; troponin T binding; calcium channel inhibitor activity
