

## Anti-CCL2 polyclonal antibody (DPAB0612RH)

This product is for research use only and is not intended for diagnostic use.

## PRODUCT INFORMATION

| Immunogen          | Recombinant human MCP-1/MCAF  |
|--------------------|---|
| Isotype            | IgG   |
| Source/Host        | Rabbit  |
| Species Reactivity | Human   |
| Purification       | Immunoaffinity chromatography employing immobilized human MCP-1/MCAF matrix. Product is sterile filtered.   |
| Conjugate          | Unconjugated  |
| Applications       | Neutralization: To yield one-half maximal inhibition [ND50] of the biological activity of human MCP-1/MCAF (10.0ng/ml), a concentration of 3.0-5.0ug/ml of this antibody is required. ELISA: To detect human MCP-1/MCAF by direct ELISA (using 100ul/well antibody solution) a concentration of at least 0.5ug/ml of this antibody is required. This antibody allows the detection of 0.2-0.4ng/well of recombinant human MCP-1/MCAF. Western blot: To detect human MCP-1/MCAF by Western blot analysis this antibody can be used at a concentration of 0.1-0.2ug/ml. The detection limit for recombinant human MCP-1/MCAF is 1.5-3.0ng/lane, under either reducing or non-reducing conditions. Each laboratory should determine an optimum working titer for use in its particular application. Other applications have not been tested but use in such assays should not necessarily be excluded. |
| Format             | Affinity Purified, Lyophilized. Reconstitute in sterile water to a concentration of >0.2mg/ml   |
| Concentration      | 1mg/ml (prior to lyophilization)  |
| Size               | 100 μg  |
| Buffer             | Lyophilized from 0.5X PBS, pH 7.4   |
| Preservative       | None  |
|                    |   |

45-1 Ramsey Road, Shirley, NY 11967, USA

The lyophilized product though stable (up to 1 month) at room temperature, is best stored at -20°C. After reconstitution, store (up to 6 weeks) at 2-8°C.

## **GENE INFORMATION**

| CCL2 chemokine (C-C motif) ligand 2 [ Homo sapiens ]  |
|---|
| CCL2  |
| CCL2; chemokine (C-C motif) ligand 2; HC11; MCAF; MCP1; MCP-1; SCYA2; GDCF-2; SMC-CF; HSMCR30; MGC9434; C-C motif chemokine 2; OTTHUMP00000163799; small-inducible cytokine A2; monocyte secretory protein JE; monocyte chemotactic protein 1; monocyte chemoattractant protein 1; monocyte chemoattractant protein-1; monocyte chemotactic and activating factor; small inducible cytokine subfamily A (Cys-Cys), member 2; small inducible cytokine A2 (monocyte chemotactic protein 1, homologous to mouse Sig-je) |
| 6347  |
| NP 002973   |
| <u>P13500</u>   |
| 17q11.2-q12   |
| Chagas disease (American trypanosomiasis); Chemokine receptors bind chemokines; Class A/1 (Rhodopsin-like receptors); Cytokine-cytokine receptor interaction; Diabetes pathways; GPCR ligand binding; IL23-mediated signaling events; Influenza A; Malaria; NOD   |
| CCR2 chemokine receptor binding; chemokine activity; heparin binding; protein binding; protein kinase activity; receptor binding; signal transducer activity  |
|   |
