

Anti-A. dispar Polyclonal antibody (DPAB1658)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Specificity	Antibody specificity was performed with an ELISA test by competition experiments with the following antigens : Compounds Cross-reactivity ratio (a) Alkaescens dispar 1 Escherichia coli O26:B6:H11 1/400 Escherichia coli mucus mutant 1/50
Target	A. dispar
Immunogen	Alkaescens dispar total proteins
Isotype	IgG
Source/Host	Rabbit
Species Reactivity	A. dispar
Conjugate	Unconjugated
Size	100 µl
Preservative	None
Storage	Store it under sterile conditions at -20°C upon receiving. Recommend to pack the protein into smaller quantities for optimal storage.

BACKGROUND

Introduction	Alkaescens dispar is a species of gram-negative, facultatively anaerobic, rod-shaped bacteria commonly found in the lower part of the intestine of warm-blooded animals. It is usually non-pathogenic, but some strains are known to produce diarrhea and pyogenic infections. It is a biotype of E coli.
