

# Rabbit anti-Pseudomonas Fluorescens Polyclonal antibody (DPAB1823)

This product is for research use only and is not intended for diagnostic use.

## PRODUCT INFORMATION

<b>Specificity</b>	Antibody specificity was performed with an ELISA test by competition experiments with the following compounds : Compounds Cross-reactivity ratio (a) Pseudomonas fluorescens 1 Pseudomonas blatchfordae 1/20 Pseudomonas marginalis 1/20 Pseu
<b>Immunogen</b>	Pseudomonas fluorescens total proteins
<b>Isotype</b>	IgG
<b>Source/Host</b>	Rabbit
<b>Conjugate</b>	Unconjugated
<b>Size</b>	100 µg
<b>Preservative</b>	None

## BACKGROUND

<b>Introduction</b>	Pseudomonas fluorescens encompasses a diverse group of bacteria that is commonly found in a wide range of terrestrial and aquatic habitats. A strain that was naturally non-ice nucleating was originally isolated and registered in the USA for suppression of frost damage to fruit crops. Other strains with anti fungal or anti bacterial activity have been isolated and commercialized in the USA and India.
<b>Keywords</b>	Bacteria; Proteobacteria; Gamma Proteobacteria; Pseudomonadales; P. fluorescens; Pseudomonadaceae; Pseudomonas; Pseudomonas fluorescens
