

Anti-AAV5 polyclonal Antiserum (DPAB2424)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Product Overview	Polyclonal Antibody to Adeno-Associated Virus
Specificity	Reacts with virus capsid proteins VP1, VP2, VP3 of AAV5; no cross-reaction with AAV types 1 - 4.
Target	AAV
Immunogen	AAV-5 capsid proteins
Isotype	IgG
Source/Host	Rabbit
Species Reactivity	AAV
Conjugate	Unconjugated
Applications	IB
Format	Serum
Size	0.25 ml
Buffer	PBS
Preservative	None
Storage	At 2-8°C

BACKGROUND

Introduction Adenoviruses are DNA viruses that cause upper respiratory tract infections, conjunctivitis, and

other infections in humans. Adenoviruses were discovered in 1953. About 47 different types have been identified since then, and about half of them are believed
