

Rabbit Anti-H9N2 (A/chicken/HongKong/NT366/03) HA Polyclonal Antibody (DPAB3958)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Product Overview	Rabbit Polyclonal antibody to H9N2 Hemagglutinin.
Antigen Description	Human influenza hemagglutinin (HA) is a surface glycoprotein required for the infectivity of the human virus. The HA tag is derived from the HA molecule corresponding to amino acids 98-106 has been extensively used as a general epitope tag in expression vectors. Many recombinant proteins have been engineered to express the HA tag, which does not appear to interfere with the bioactivity or the biodistribution of the recombinant protein. This tag facilitates the detection, isolation, and purification of the proteins.
Specificity	Reacts with human and avian H9 (H9N2). Cross-reactivity to other HAs not tested.
Target	IAV H9N2 Hemagglutinin
Immunogen	in vivo expressed hemagglutinin (H9N2)
Isotype	IgG
Source/Host	Rabbit
Species Reactivity	IAV
Purification	Immunoaffinity chromatography
Conjugate	Unconjugated
Applications	WB, ELISA
Size	100 µg

Preservative	None
Storage	Store at 4°C; DO NOT FREEZE; Stable for 6 months from the date of shipment. Non-hazardous.

BACKGROUND

Introduction	H9N2 is a subtype of the species Influenza A virus (bird flu virus)
Keywords	HA; HA1; HA2; Hemagglutinin; Hemagglutinin HA1 chain; Hemagglutinin HA2 chain; HA (H9N2); H9N2 Hemagglutinin; Group V; Orthomyxoviridae; Influenzavirus A; Influenzavirus B; Influenzavirus C; Isavirus; Thogotovirus
