

# Anti- BFP Polyclonal antibody (DPAB4228)

This product is for research use only and is not intended for diagnostic use.

## PRODUCT INFORMATION

<b>Product Overview</b>	Polyclonal Antibody to Blue Fluorescent Protein. The Blue Fluorescent Protein (BFP) can be used as protein marker to study subcellular localization or translocation of proteins.
<b>Target</b>	BFP
<b>Immunogen</b>	Recombinant BFP expressed from E. coli.
<b>Isotype</b>	IgG
<b>Source/Host</b>	Rabbit
<b>Species Reactivity</b>	N/A
<b>Conjugate</b>	Unconjugated
<b>Applications</b>	WB
<b>Reconstitution</b>	Can be diluted in other aqueous buffers at the concentrations determined for the respective application.
<b>Format</b>	Liquid This antibody is supplied in PBS pH7.4, 0.5% BSA, 0.02% Sodium Azide and 50% Glycerol
<b>Size</b>	100 µg
<b>Preservative</b>	None
<b>Storage</b>	Store at -20°C. For long-term storage, aliquot and refreeze at -70°C. Avoid repeated freeze/thaw cycles.

## BACKGROUND

**Introduction**

Fluorescent proteins, like BFP, can be used as protein "tags" to study the subcellular localization of proteins and/or their translocation upon stimulation or as markers for transfection in transient and stable expression systems.
