

Desipramine HCl Standard solution (DWT60)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Product Overview 1.0 mg/mL analytical Desipramine Standard

Conjugate N/A

Cas.No 58-28-6

Molecular Weight 302.84g/mol

Format Liquid

Concentration 1.0 mg/mL

Size 1 ml

Buffer Methanol

Storage Store unopened in freezer(-10°C to 25°C)

BACKGROUND

Introduction Desipramine is a drug belonging to the tricyclic antidepressant (TCA) class, whose action is to inhibit the reuptake of norepinephrine. In addition to the treatment of depression, Desipramine has also found use in treating neuropathic pain and the symptoms of Attention Deficit Disorder (which has been linked to the underproduction of norepinephrine).

Keywords Norpramin; Pertofrane; Desipramine
