

Anti-HP polyclonal antibody (CABT-BL1827)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Immunogen	Affinity purified human haptoglobin.
Isotype	IgG
Source/Host	Goat
Species Reactivity	Human
Purification	Whole antiserum
Conjugate	Unconjugated
Applications	AP
Cellular Localization	Secreted.
Format	Liquid
Buffer	Tris buffered saline
Preservative	0.1% Sodium Azide
Storage	Add glycerol to a final volume of 50%, aliquot and store at -20°C. Avoid repeated freeze / thaw cycles.

BACKGROUND

Introduction	As a result of hemolysis, hemoglobin is found to accumulate in the kidney and is secreted in the urine. Haptoglobin captures, and combines with free plasma hemoglobin to allow hepatic recycling of heme iron and to prevent kidney damage. Haptoglobin also acts as an Antimicrobial; Antioxidant, has antibacterial activity and plays a role in modulating many aspects of the acute phase response. Hemoglobin/haptoglobin complexes are rapidly cleared
---------------------	---

by the macrophage CD163 scavenger receptor expressed on the surface of liver Kupfer cells through an endocytic lysosomal degradation pathway. Uncleaved haptoglobin, also known as zonulin, plays a role in intestinal permeability, allowing intercellular tight junction disassembly, and controlling the equilibrium between tolerance and immunity to non-self antigens.

GENE INFORMATION

Entrez Gene ID	3240
