

Anti-RITUXIMAB antibody (CABT-BL3156)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Immunogen	F(ab)2 fragment of Rituximab
Isotype	IgG2a
Source/Host	Rat
Species Reactivity	N/A
Conjugate	Unconjugated
Applications	FC, ELISA
Format	Purified
Buffer	Phosphate buffered saline
Preservative	None
Storage	Store at +4°C. DO NOT FREEZE. This product should be stored undiluted. Should this product contain a precipitate we recommend microCentrifugation before use.
Ship	0.1 mg

BACKGROUND

Introduction	Rituximab (trade names Rituxan, MabThera and Zytux) is a chimeric monoclonal antibody against the protein CD20, which is primarily found on the surface of immune system B cells. Rituximab destroys B cells and is therefore used to treat diseases which are characterized by excessive numbers of B cells, overactive B cells, or dysfunctional B cells. This includes many lymphomas, leukemias, transplant rejection, and autoimmune disorders.
