

Anti-Transferrin polyclonal antibody (CABT-BL3668)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Immunogen	Rabbit Transferrin
Source/Host	Sheep
Species Reactivity	Rabbit
Purification	Affinity chromatography
Conjugate	Unconjugated
Applications	IHC, WB, ELISA
Buffer	PBS, pH8.3 with 0.1% Sodium Azide (NaN ₃)
Preservative	0.1% Sodium Azide
Storage	-20°C. Avoid freeze/thaw

BACKGROUND

Introduction	Transferrins are iron binding transport proteins which can bind two Fe(3+) ions in association with the binding of an anion, usually bicarbonate. It is responsible for the transport of iron from sites of absorption and heme degradation to those of storage and utilization. Serum transferrin may also have a further role in stimulating cell proliferation.
