

Anti-PFBV polyclonal antibody (CABT-BL6157)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Immunogen	Antiserum is developed in rabbit using purified virus as immunogen.
Isotype	IgG
Source/Host	Rabbit
Purification	caprylic acid purified
Conjugate	Unconjugated
Applications	ELISA
Format	Liquid
Size	200 µl, 1 ml
Buffer	In 0.1 M phosphate buffered saline, pH 7.4.
Preservative	None
Storage	The antibody should be stored at 2-8°C. For storage longer then one year, the solution may be frozen at -20°C. Repeated freezing and thawing is not recommended. The solution may be frozen in aliquots if necessary. The antibody has a shelf-live of 2 years after date of purchase.

BACKGROUND

Introduction	PFBV is mainly occuing in Europe. It is restrected to geraniums (Pelargonium zonale and Pelargonium peltatum). It is transmitted by inoculation of sap. It causes flower-breaking in some pelargonium seedling lines, but is symptomless in many cultivars.
Keywords	Pelargonium flower-break virus; PFBV
