

Anti-Cff polyclonal antibody [AP] (CABT-BL6283)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Immunogen	Antiserum is developed in rabbit using pure cultures of bacteria as immunogen.
Source/Host	Rabbit
Purification	caprylic acid purified
Conjugate	AP
Applications	ELISA
Format	Liquid
Size	200 µl, 1 ml
Buffer	In 0.05 M TRIS buffer, pH 8.0 and 50% glycerol.
Preservative	None
Storage	The antibody should be stored at 2-8°C. For storage longer then one year, the solution may be frozen at -20°C. Repeated freezing and thawing is not recommended. The solution may be frozen in aliquots if necessary. The antibody has a shelf-live of 2 years after date of purchase.

BACKGROUND

Introduction	The bacterium can be transmitted both within and on the seed; it is very resistant to drying and can remain viable for up to 24 years in seed stored in the laboratory. In the field it has been known to survive in soil for at least two winters between bean crops rotated with wheat. There are no reports of vectors, but the nematode Meloidogyne incognita may assist entry by providing wounds.
