

Anti-Psl polyclonal antibody [AP] (CABT-BL6289)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Immunogen	Antiserum is developed in rabbit using pure cultures of bacteria as immunogen.
Source/Host	Rabbit
Purification	caprylic acid purified
Conjugate	AP
Applications	ELISA
Format	Liquid
Size	200 µl, 1 ml
Buffer	In 0.05 M TRIS buffer, pH 8.0 and 50% glycerol.
Preservative	None
Storage	The antibody should be stored at 2-8°C. For storage longer than one year, the solution may be frozen at -20°C. Repeated freezing and thawing is not recommended. The solution may be frozen in aliquots if necessary. The antibody has a shelf-life of 2 years after date of purchase.

BACKGROUND

Introduction	Angular leaf spot of cucurbits is caused by the bacterium <i>Pseudomonas syringae</i> pv. <i>lachrymans</i> . The bacterium attacks the leaves, stems and fruit of cucurbit plants. On leaves the bacterium causes small, angular, watersoaked areas which later turn brown or straw-colored. Leaf lesions are delimited by the veins, hence the angular appearance of the lesions.
