

Mouse Anti-19-methyltestosterone monoclonal antibody, clone NT (CABT-L3097)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Immunogen	Methyltestosterone with carrier protein.
Isotype	IgG
Source/Host	Mouse
Species Reactivity	N/A
Clone	NT
Purification	Purified from mouse ascites.
Conjugate	Unconjugated
Applications	ELISA, LFIA
Format	Liquid
Concentration	Lot specific
Size	1 mg
Buffer	PBS
Preservative	None
Storage	Long time storage is recommended at -20°C.
Ship	Wet ice

BACKGROUND

Introduction

Methyltestosterone and methylboldenone are orally active synthetic derivatives of testosterone. In addition to human clinical applications, and illegal use as a growth promoter in cattle, methyltestosterone has been used as a masculinising agent in aquaculture. Methyltestosterone and methylboldenone are mainly excreted in urine as glucuronides of hydroxylated metabolites.
