

## **Human APP blocking peptide (CDBP0394)**

This product is for research use only and is not intended for diagnostic use.

## PRODUCT INFORMATION

Product Overview	APP ( N - term ) peptide ( human )
Antigen Description	This gene encodes a cell surface receptor and transmembrane precursor protein that is cleaved by secretases to form a number of peptides. Some of these peptides are secreted and can bind to the acetyltransferase complex APBB1/TIP60 to promote transcriptional activation, while others form the protein basis of the amyloid plaques found in the brains of patients with Alzheimer disease. Mutations in this gene have been implicated in autosomal dominant Alzheimer disease and cerebroarterial amyloidosis (cerebral amyloid angiopathy). Multiple transcript variants encoding several different isoforms have been found for this gene. [provided by RefSeq, Jul 2008]
Species	Human
Conjugate	Unconjugated
Applications	BL, IHC
Concentration	0.2 mg/ml
Size	50 μg
Buffer	PBS with 0.1% BSA 0.02% sodium azide pH7.2
Preservative	0.02% Sodium Azide
Storage	Upon receipt - Keep as concentrated solution. Aliquot and store at -20°C or below. Avoid freeze-thaw cycles.

## **GENE INFORMATION**

Gene Name APP amyloid beta (A4) precursor protein [ Homo sapiens (human) ]

45-1 Ramsey Road, Shirley, NY 11967, USA
