

Mouse CX3CR1 blocking peptide (CDBP0914)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Product Overview	CX3CR1 (C - term) peptide (mouse)
Antigen Description	Fractalkine is a transmembrane protein and chemokine involved in the adhesion and migration of leukocytes. The protein encoded by this gene is a receptor for fractalkine. The encoded protein also is a coreceptor for HIV-1, and some variations in this gene lead to increased susceptibility to HIV-1 infection and rapid progression to AIDS. Four transcript variants encoding two different isoforms have been found for this gene.
