

Human NRBP1 blocking peptide (CDBP2091)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Product Overview	Blocking/Immunizing peptide for anti-NRBP1/MADM antibody
Antigen Description	NRBP1 (nuclear receptor binding protein 1) is a protein-coding gene. Diseases associated with NRBP1 include bell's palsy, and myeloid leukemia, and among its related super-pathways are Gene Expression and Nuclear Receptors. GO annotations related to this gene include protein kinase activity and protein homodimerization activity. An important paralog of this gene is WNK1.
