

RSV Positive Sample (DAG-H10378)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Antigen Description	This product contains inactivated Human respiratory syncytial vtrus (HRSV) m storage buffer.
Species	RSV
Conjugate	Unconjugated
Preservative	None
Storage	Store this preparation at 2°C to 8°C.

BACKGROUND

Introduction	Human respiratory syncytial virus (RSV) is a virus that causes respiratory tract infections. It is a major cause of lower respiratory tract infections and hospital visits during infancy and childhood. A prophylactic medication (not a vaccine) exists for preterm (under 35 weeks gestation) infants, infants with certain congenital heart defects (CHD) or bronchopulmonary dysplasia (BPD), and infants with congenital malformations of the airway. Treatment is limited to supportive care (for example C-PAP), including oxygen therapy.
Keywords	RSV; Respiratory Syncytial Virus
