

Human IgG1 Kappa Isotype Control Antibody (Low Endotoxin, Azide-Free) (DAG-IC61)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Isotype	lgG1, κ
Source/Host	Human
Species Reactivity	N/A
Conjugate	Functional Grade
Applications	ELISA, FLISA, FC, IP, Control, Blocking, SPR
Format	Liquid
Concentration	Batch dependent - please inquire should you have specific requirements.
Size	100 μg
Buffer	Supplied in borate buffered saline, pH 8.2
Preservative	None
Storage	Store at 2-8°C
Size Buffer Preservative	100 μg Supplied in borate buffered saline, pH 8.2 None

BACKGROUND

Introduction

Isotype controls are primary antibodies that lack specificity to the target, but match the class and type of the primary antibody used in the application. Isotype controls are used as negative controls to help differentiate non-specific background signal from specific antibody signal. Depending upon the isotype of the primary antibody used for detection and the target cell types involved, background signal may a significant issue in various experiments.
