

HSV type 2 (aa 266 - 394) (DAG-T1111)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Product Overview	E.coli derived protein recombinant. The protein contains the HSV-2 gD immunodominant region (266-394aa)
Species	HSV
Conjugate	Unconjugated
Preservative	None
Storage	Store at 2–8 °C

BACKGROUND

Introduction	Herpes simplex virus 1 and 2 (HSV-1 and HSV-2), also known as human herpesvirus 1 and 2 (HHV-1 and HHV-2), are two members of the herpesvirus family, Herpesviridae, that infect humans. Both HSV-1 (which produces most cold sores) and HSV-2 (which produces most genital herpes) are ubiquitous and contagious. They can be spread when an infected person is producing and shedding the virus. Herpes simplex can be spread through contact with saliva, such as sharing drinks.
Keywords	Herpes simplex virus-2 gD; HSV-2 gD
