

Human alpha 1-microglobulin reference serum (DAGA-639)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Antigen Description Alpha-1-microglobulin (A1M, α 1-microglobulin, sometimes also called Protein HC) is a microglobulin, a small globular protein. It is found in all vertebrates, including humans, and is distributed in blood plasma and extravascular tissues of all organs. It is synthesized in most cells of the body, but mainly in the liver from a gene that codes for the alpha-1-microglobulin/bikunin precursor.

Specificity Human

Conjugate Unconjugated

Format Liquid

Concentration Batch dependent - please inquire should you have specific requirements

Size 1 ml

Preservative 0.1% Sodium Azide

Storage Frozen -20°C
