

Rat immunoglobulin reference serum (DAGA-695)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Antigen Description	Immunoglobulin (Ig), There are four IgG subclasses (IgG1, 2, 3 and 4) in humans, named in order of their abundance in serum (IgG1 being the most abundant). IgG2 is the only IgG subclass which passes through the placenta at a level generally lower than that found in the mother. A deficiency of IgG2 indicates a poor antibody response to bacterial polysaccharides and can lead to increased susceptibility to infections caused by encapsulated bacteria
Specificity	Rat
Nature	Native
Expression System	Rat
Conjugate	Unconjugated
Procedure	None
Format	Liquid
Concentration	Batch dependent - please inquire should you have specific requirements
Size	1 ml
Preservative	0.1% Sodium Azide
Storage	Frozen -20°C

BACKGROUND

Keywords Rat; Immunoglobulin; Serum
