

## Recombinant SARS-CoV-2 NSP3 [His] (DAGC200)

This product is for research use only and is not intended for diagnostic use.

## PRODUCT INFORMATION

| Product Overview | Recombinant SARS-CoV-2 NSP3 is produced by E.coli expression system and the target gene encoding Glu1024-Gln1198 is expressed with N-His Tag.                         |
|------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Species          | SARS-CoV-2                                                                                                                                                            |
| Purity           | > 90 % as determined by SDS-PAGE.                                                                                                                                     |
| Conjugate        | His                                                                                                                                                                   |
| Applications     | Immunogen                                                                                                                                                             |
| Molecular Weight | Predicted molecular weight 22.03kDa                                                                                                                                   |
| Format           | Liquid/Lyophilized                                                                                                                                                    |
| Size             | 100 μg, 1 mg                                                                                                                                                          |
| Buffer           | Supplied as solution form in PBS, pH 7.5/Supplied as lyophilized from PBS,pH 7.5                                                                                      |
| Preservative     | None                                                                                                                                                                  |
| Storage          | Use a manual defrost freezer and avoid repeated freeze thaw cycles. Store at 2 to 8°C for one week. Store at -20 to -80°C for twelve months from the date of receipt. |

## **BACKGROUND**

Introduction The multi-domain non-structural protein 3 (Nsp3) is the largest protein encoded by the

coronavirus (CoV) genome, with an average molecular mass of about 200 kD. Nsp3 is an essential component of the replication/transcription complex. It comprises various domains, the

organization of which differs between CoV genera, due to duplication or absence of some domains. However, eight domains of Nsp3 exist in all known CoVs: the ubiquitin-like domain 1 (UbI1), the Glu-rich acidic domain (also called "hypervariable region"), a macrodomain (also named "X domain"), the ubiquitin-like domain 2 (UbI2), the papain-like protease 2 (PL2pro), the Nsp3 ectodomain (3Ecto, also called "zinc-finger domain"), as well as the domains Y1 and CoV-Y of unknown functions. In addition, the two transmembrane regions, TM1 and TM2, exist in all CoVs.
