

Magic™ Anti-TSH monoclonal antibody, clone 068-22007 (DCAB-TJ253)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Immunogen	Source: Human Pituitary Gland
Isotype	IgG1
Source/Host	Mouse
Species Reactivity	Human
Clone	068-22007
Affinity Constant	1 x 10 ⁹ L/m
Purification	≥ 90% pure (SDS-PAGE). Protein A Chromatography. Product is 0.2 µm filtered.
Conjugate	Unconjugated
Applications	Suitable for use in ELISA. Each laboratory should determine an optimum working titer for use in its particular application. Other applications have not been tested but use in such assays should not necessarily be excluded. Recommended pairs for sandw Suggested pair for testing (Capture - Detection): DCAB-TJ251 - DCAB-TJ253
Format	Purified, Liquid
Concentration	4.96 mg/mL (OD280 nm, E1% = 14)
Size	1 mg
Buffer	10 mM Sodium Phosphate, pH 7.4 ± 0.2 containing 150 mM Sodium Chloride.
Preservative	0.1% Sodium Azide

Storage	Short term (up to 7 days) store at 2-8°C. Long term, aliquot and store at -20°C. Avoid multiple freeze/thaw cycles.
----------------	---

BACKGROUND

Introduction	Thyroid-stimulating hormone (also known as thyrotropin, TSH, or hTSH for human TSH) is a hormone that stimulates the thyroid gland to produce thyroxine (T4), and then triiodothyronine (T3) which stimulates the metabolism of almost every tissue in the body. It is a glycoprotein hormone synthesized and secreted by thyrotrope cells in the anterior pituitary gland, which regulates the endocrine function of the thyroid gland.
