

Anti-ARFRP1 monoclonal antibody (DCABH-10584)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Antigen Description	The protein encoded by this gene is a membrane-associated GTP-ase and localizes to the plasma membrane. It is related to the ADP-ribosylation factor (ARF) and ARF-like (ARL) genes. The gene is located in a gene cluster that includes the a gene (M68) that is overexpressed in some tumors. Alternatively spliced transcript variants encoding different isoforms have been identified.
Immunogen	A synthetic peptide of human ARFRP1 is used for rabbit immunization.
