

Anti-CWC27 monoclonal antibody (DCABH-201437)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Antigen Description	CWC27 (CWC27 spliceosome-associated protein homolog (S. cerevisiae)) is a protein-coding gene. Diseases associated with CWC27 include colon cancer, and pneumonia. GO annotations related to this gene include peptidyl-prolyl cis-trans isomerase activity. An important paralog of this gene is PPIH. PPIases accelerate the folding of proteins (By similarity).
