

Mouse Anti-Human GLP-1(aa 7-36) monoclonal antibody, clone N92485 (DCABY-4440)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

| Product Overview | Anti-GLP-1 (Mid-molecule specific) monoclonal antibody |
|--------------------|---|
| Specificity | Reacts with all forms of GLP-1, including precursor and GLP-1(9-37) /GLP-1(9-36amide) metabolite. DCABY-4440 cross-reacts with Liraglutide. |
| Immunogen | Synthetic GLP-1(7-36)amide coupled to carrier |
| Isotype | lgG2a, к |
| Source/Host | Mouse |
| Species Reactivity | Human |
| Clone | N92485 |
| Purification | Protein A purified |
| Conjugate | Unconjugated |
| Applications | ELISA, WB |
| Epitope | Mid-molecular epitope of GLP-1 |
| Format | Liquid |
| Concentration | Lot specific |
| Buffer | 0.01 M phosphate buffer, pH 7.4, containing 0.5 M NaCl |
| Preservative | 15mM Sodium Azide |
| | |

Ship Wet ice

BACKGROUND

Introduction Glucagon-like peptide 1(7-36)amide (GLP-1(7-36)amide) is the principal active form of GLP-1,

> the other being GLP-1(7-37). GLP-1 is a peptide hormone of the glucagon family, produced by the L cells of the intestinal mucosa from the same prohormone as glucagon. The active forms are potent stimulators of glucose-dependent insulin secretion. The sequence of GLP-1 is fully

conserved in all mammalian species examined so far.

Keywords GCG;glucagon;GLP1;GLP2;GRPP;preproglucagon

GENE INFORMATION

| Entrez Gene ID | <u>2641</u> |
|----------------|---------------|
| UniProt ID | <u>P01275</u> |
