

User's Manual

Human AKR1B10(Aldo-keto reductase family 1 member B10) ELISA Kit

DEIA-FN92

96T

This product is for research use only and is not intended for diagnostic use.

For illustrative purposes only. To perform the assay the instructions for use provided with the kit have to be used.

PRODUCT INFORMATION

Intended Use

AKR1B10 ELISA Kit allows for the in vitro quantitative determination of AKR1B10 concentrations in serum, plasma, tissue homogenates and other biological fluids.

Storage

2-8 °C for 6 months

Typical Standard Curve

Precision

Intra-Assay: CV<8%

Inter-Assay: CV<10%

Detection Range

0.781-50ng/ml

Sensitivity

< 0.469ng/ml

Linearity

The linearity of the kit was assayed by testing samples spiked with appropriate concentration of AKR1B10 and their serial dilutions. The results were demonstrated by the percentage of calculated concentration to the expected.

Sample	1:2	1:4	1:8
serum(n=5)	89-104%	88-105%	87-100%
EDTA plasma(n=5)	83-96%	84-99%	86-96%
heparin plasma(n=5)	80-95%	85-97%	80-94%

Recovery

Matrices listed below were spiked with certain level of AKR1B10 and the recovery rates were calculated by comparing the measured value to the expected amount of AKR1B10 in samples.

Matrix	Recovery range(%)	Average(%)
serum(n=5)	85-104	95
EDTA plasma(n=5)	86-102	95
heparin plasma(n=5)	93-105	99
