

Anti-Human IgHM monoclonal antibody, clone DH3 [Alexa Fluor® 647] (DMAB-F1022MH)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Specificity	This reacts with Fc fragment of human IgM. Specificity was confirmed by Western blotting analysis of purified human IgM, under reducing conditions, and also by immunofluorescence staining of Daudi cells
Immunogen	Full length native protein (purified) (Human)
Source/Host	Mouse
Species Reactivity	Human
Clone	DH3
Purification	Ion exchange chromatography
Conjugate	Alexa Fluor 647
Applications	WB, ELISA, FC, ICC/IF
Buffer	50 mM Sodium Borate
Preservative	None
Storage	The antibody solution should be stored between 2°C and 8°C, and protected from prolonged exposure to light. Do not freeze.

GENE INFORMATION

Gene Name	IGHMimmunoglobulin heavy constant mu [Homo sapiens]
Official Symbol	IGHM
Synonyms	IGHM; immunoglobulinheavy constant mu; MU; VH; AGM1; FLJ00385; MGC52291; MGC104996;DKFZp686l15196; DKFZp686l15212; Ig mu chain C region; IgM
Chromosome Location	14q32.33
Pathway	B Cell ReceptorSignaling Pathway
Function	antigen binding
