

Mouse anti-2,6-Dichlorobenzamide Monoclonal antibody, clone IZC 274-02 (DMAB5752)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Product Overview	Mouse monoclonal to 2,6-dichlorobenzamide.
Antigen Description	The pesticide (herbicide) metabolite 2,6-dichlorobenzamide (BAM). BAM is a methobolite from the herbicide dichlobenil.
Specificity	10 % cross-reactivity for 2,6-dichlorothiobenzamide.
Isotype	IgG1
Source/Host	Mouse
Clone	IZC 274-02
Conjugate	Unconjugated
Applications	ELISA
Format	0.01 M PB, pH 7.4, with 0.5 M NaCl.
Concentration	1 mg/mL, based on E(1%)=14.0 at A280
Storage	2-8°C.

BACKGROUND

Introduction	2,6-Dichlorobenzamide (BAM) is the dominant degradation product in soil of dichlobenil, a commonly used herbicide.
Keywords	2,6-dichlorobenzamide; 2,6-Dichlorobenzamide; BAM
