

Anti-Nafcillin monoclonal antibody, clone DI2079 (DMAB8267)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Product Overview	Murine monoclonal antibody to Nafcillin.
Specificity	Nafcillin; <1% cross-reactivity with other β -lactams, other classes of antibiotics, or milk and serum proteins.
Isotype	IgG1
Source/Host	Mouse
Species Reactivity	N/A
Clone	DI2079
Conjugate	Unconjugated
Format	Ascites, diluted with PBS, 0.05% Sodium Azide.
Size	1 ml
Preservative	0.05% Sodium Azide
Storage	-20 C; do not freeze-thaw.

BACKGROUND

Introduction	Nafcillin sodium is a narrow-spectrum beta-lactam antibiotic of the penicillin class. As a beta-lactamase-resistant penicillin, it is used to treat infections caused by Gram-positive bacteria, in particular, species of staphylococci that are resistant to other penicillins. Nafcillin is considered therapeutically equivalent to oxacillin, although its safety profile is somewhat different.
