

# Anti-Patulin polyclonal antibody (DPAB-CL009)

This product is for research use only and is not intended for diagnostic use.

## PRODUCT INFORMATION

<b>Antigen Description</b>	Patulin is a mycotoxin produced by a variety of molds, particularly <i>Aspergillus</i> and <i>Penicillium</i> . It is commonly found in rotting apples, and the amount of patulin in apple products is generally viewed as a measure of the quality of the apples used in production. It is not a particularly potent toxin, but a number of studies have shown that it is genotoxic.
<b>Immunogen</b>	BSA-conjugated patulin
<b>Isotype</b>	IgG
<b>Source/Host</b>	Rabbit
<b>Species Reactivity</b>	N/A
<b>Conjugate</b>	Unconjugated
<b>Applications</b>	ELISA
<b>Format</b>	rabbit polyclonal total IgG in PBS pH 7.4, lyophilized. 0.2 mg, please add 0.2 ml of sterile water before use.
<b>Size</b>	100 µg
<b>Buffer</b>	Purified antibodies were dialyzed against dionized water.
<b>Preservative</b>	None
<b>Storage</b>	4°C after reconstitution.

## BACKGROUND

<b>Introduction</b>	Patulin is a mycotoxin produced by a variety of molds, particularly <i>Aspergillus</i> and <i>Penicillium</i> . It is commonly found in rotting apples, and the amount of patulin in apple products is generally
