

Magic™ Anti-Arabidopsis thaliana CESA1 (Phospho S162) polyclonal antibody (DPAB-DC3385)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Antigen Description	Encodes a cellulose synthase isomer. CESA1 mutants have cellulose defect in the primary cell wall. Multiple lines of evidence suggest that CESA1, along with CESA3 and CESA6 are present in the same plasma membrane complex for cellulose biosynthesis. Iasma membrane complex for cellulose biosynthesis. As inferred from the null role of secondary wall-type CesAs, included in a set of five primary wall-type CesAs that may support trichome cell wall thickening.
