

Anti-Carcinoembryonic antigen polyclonal antibody (DPAB-DC4071)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Specificity	This antibody is specific to human CEA. No cross-reactivity with human NCA, NCA2 or BGP1 (Biliary glycoprotein-I).
Target	Carcinoembryonic antigen
Immunogen	Native purified human Carcino Embryonic Antigen.
Source/Host	Goat
Species Reactivity	Human
Conjugate	Unconjugated
Applications	sELISA,
Format	Liquid
Size	1 mg
Buffer	In 15 mM KPO4 buffer, 0.85% NaCl, pH 7.4 (0.1% sodium azide)
Preservative	0.1% Sodium Azide
Storage	Store at 4°C.

BACKGROUND

Introduction	Carcinoembryonic antigen (CEA) describes a set of highly related glycoproteins involved in cell adhesion. CEA is normally produced in gastrointestinal tissue during fetal development, but the production stops before birth. Therefore CEA is usually present
