

Anti-ARSK (aa 163-363) polyclonal antibody (DPABH-08395)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Antigen Description	ARSK (arylsulfatase family, member K) is a protein-coding gene. Among its related super-pathways are Sphingolipid metabolism and The activation of arylsulfatases. GO annotations related to this gene include arylsulfatase activity and metal ion binding. An important paralog of this gene is IDS.
Immunogen	Recombinant fragment within Human ARSK aa 163-363. The exact sequence is proprietary. Database link: BC130329
Isotype	IgG
Source/Host	Rabbit
Species Reactivity	Human
Purification	Immunogen affinity purified
Conjugate	Unconjugated
Applications	IHC-P, WB
Format	Liquid
Size	100 µg
Buffer	pH: 7.20; Constituents: 1% BSA, 98% PBS
Preservative	0.02% Sodium Azide
Storage	Shipped at 4°C. Store at 4°C short term (1-2 weeks). Upon delivery aliquot. Store at -20°C long term. Avoid freeze / thaw cycle.

GENE INFORMATION

Gene Name	ARSK arylsulfatase family, member K [Homo sapiens]
Official Symbol	ARSK
Synonyms	ARSK; arylsulfatase family, member K; arylsulfatase K; DKFZp313G1735; TSULF; ASK; telethon sulfatase;
Entrez Gene ID	153642
Protein Refseq	NP_937793
UniProt ID	Q6UWY0
Chromosome Location	5q15
Function	arylsulfatase activity; hydrolase activity; metal ion binding;
