

Anti-TINCR (N-terminal) polyclonal antibody (DPABH-22226)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Antigen Description	This locus is inferred to be non-protein-coding based on the observations that a) there is no homology support for predicted open reading frames; and b) the location of the longer predicted open reading frame renders the transcript a candidate for nonsense-mediated decay (NMD) as the stop codon is >50 nucleotides upstream of the terminal splice site.
Specificity	DPABH-22226 is predicted to not cross-react with other PLAC family protein members.
Immunogen	17 amino acid synthetic peptide near the center of Human PLAC2 (AAQ15237).
Isotype	IgG
Source/Host	Rabbit
Species Reactivity	Human
Purification	Immunogen affinity purified
Conjugate	Unconjugated
Applications	ICC/IF, WB
Format	Liquid
Size	100 µg
Buffer	Constituents: PBS
Preservative	0.02% Sodium Azide
Storage	Store at 4°C.

GENE INFORMATION

Gene Name	TINCR tissue differentiation-inducing non-protein coding RNA [Homo sapiens]
Official Symbol	TINCR
Synonyms	TINCR; tissue differentiation-inducing non-protein coding RNA; PLAC2; LINC00036; NCRNA00036;
Entrez Gene ID	257000
