

## Anti-MDM2 (aa 177-198) polyclonal antibody (DPABH-28560)

This product is for research use only and is not intended for diagnostic use.

## PRODUCT INFORMATION

Antigen Description	E3 ubiquitin-protein ligase that mediates ubiquitination of p53/TP53, leading to its degradation

by the proteasome. Inhibits p53/TP53- and p73/TP73-mediated cell cycle arrest and apoptosis by binding its transcriptional activation domain. Also acts as an ubiquitin ligase E3 toward itself and ARRB1. Permits the nuclear export of p53/TP53. Promotes proteasome-dependent ubiquitin-independent degradation of retinoblastoma RB1 protein. Inhibits DAXX-mediated apoptosis by inducing its ubiquitination and degradation. Component of the TRIM28/KAP1-MDM2-p53/TP53 complex involved in stabilizing p53/TP53. Also component of the

TRIM28/KAP1-ERBB4-MDM2 complex which links growth factor and DNA damage response

pathways.
