

Anti-Acetyl-Lysine (C-terminal) polyclonal antibody (DPATB-H81026)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Product Overview	Sheep Anti-acetyl Lysine Polyclonal Antibody
Target	acetyl Lysine
Immunogen	Tetra-acetylated synthetic N-terminal peptide, corresponding to amino acids 1-18 of Human histone H4.
Isotype	IgG
Source/Host	Sheep
Species Reactivity	Human
Purification	Whole antiserum
Conjugate	Unconjugated
Applications	ICC, IF, WB, ELISA
Positive Control	ICC/IF: HeLa cells gamma irradiated with 10-20 Gy
Format	Liquid
Size	100 µl
Preservative	None
Storage	Shipped at 4°C. Upon delivery aliquot and store at -20°C or -80°C. Avoid repeated freeze / thaw cycles.

BACKGROUND

Introduction

Acetylation of lysine is an important, reversible posttranslational modification. Lysine acetylation is a dynamic process that is used to regulate protein-DNA and protein-protein interactions. Lysine acetylation involves the reversible transfer of acetylC
